Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the Federal Register concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the CFTC is publishing notice of the proposed collection of information listed below.

Title: Generic Clearance for Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: In accordance with section 748 of the Dodd-Frank Act, the OCO anticipates undertaking a variety of service delivery-focused activities over the next few years which include consumer outreach and information-sharing with stakeholders that are responsive to stakeholders’ needs and sensitive to changes in the consumer market. The proposed information collection activity will use similar methods for information collection or otherwise share common elements, and provide a means to gather qualitative customer and stakeholder feedback in an efficient, timely manner. By qualitative feedback we mean information that provides useful information on perceptions and opinions. The solicitation of information on delivery of consumer services will address such areas as appropriate messages, effective message delivery methods, effective event outreach tactics and characteristics, new outreach program ideas

and content, and current consumer beliefs, psychographics and social norms that will assist the agency in developing outreach and communications campaigns. Since these systems will use similar methods for information collection or otherwise share common elements, the OCO is proposing a generic clearance for this process which will allow the OCO to implement these systems and meet the obligations of the PRA without the delays of the normal clearance process. Collection methods may include focus groups and surveys as well as other relevant collection methods that meet the conditions appropriate for a generic clearance as outlined below. The OCO will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondent, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are non-controversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered is intended to be used only internally for general service improvement and program management purposes and is not intended for release outside

of the Commission (if released, the Commission must indicate the qualitative nature of the information);

- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study. Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;

With respect to the collection of information, the Commission invites comments on:

- The accuracy of the Commission's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.
